RE: Network Technician Co-Op (Onsite)

Dear Mrs. Sandher:

As a Computing Science student at Simon Fraser University with a strong foundation in network administration and IT support, I am eager to apply for the Network Technician Co-Op position at OSI Maritime Systems Ltd. Your commitment to providing cutting-edge maritime systems aligns with my passion for troubleshooting network infrastructure and ensuring the availability of IT systems.

Through my experience developing CourseBot, a comprehensive Discord application leveraging Python and AWS, I have honed my ability to work with system logs, maintain data integrity, and implement robust security measures. Additionally, my academic background has provided me with a strong understanding of LAN/WAN networking, Windows 10 support, and IT troubleshooting.

My role as a STEAM & Coding Instructor at Science Alive has refined my ability to communicate technical concepts clearly and assist users in troubleshooting issues, while my experience at Steamoji as a Camp Facilitator has strengthened my problem-solving abilities in fast-paced environments.

I am excited about the prospect of contributing my technical skills and collaborative approach to OSI Maritime Systems Ltd. I would welcome the opportunity to discuss how my experience aligns with your needs. Thank you for your time and consideration.

Sincerely,

Sajan Senghera
